

LOWER LOS ANGELES RIVER

Signature Projects

Compton Creek Confluence Area – Potential Design Features

- **LA River Modification**
Terracing, river widening, and 710 relief drain options.
- **Multi-use trails, bridges, and overlooks**
Trails and bridges for pedestrians, bicyclists, and equestrians. Potential staging area on east side of river near Dominguez Gap Wetlands.
- **Rubber Dam**
The rubber dam will be evaluated to create a temporary inundation area for water reuse. The water stored behind the rubber dam will provide a temporary recreation area.
